## SUMMARY

---

### ABOUT ME

A dedicated MERN stack developer with a passion for building scalable, end-to-end web applications. Proficient in crafting responsive user interfaces with React and architecting secure, RESTful APIs with Node.js. Experienced in containerizing applications with Docker and passionate about modern DevOps practices

### EXPERIENCE

---

**Freelance web deve** Mar '25 — Present  
Upwork Chakwal  
I worked as a freelance web developer at upwork . Delivered High quality projects .

### EDUCATION

---

**Bachelor's of Information Technology in Information Technology**, The University of Chakwal (GPA: 3.75) Sep '22 — Aug '26

### CERTIFICATIONS

---

**AI for everyone course certificate**  
**Introduction to HTML CSS Javascript**, IBM Coursera  
**Git and Github**, IBM Coursera  
**Javascript programming**, IBM Coursera  
**React**, IBM Coursera

### AWARDS

---

**Honhar Scholarship program** Jan '01  
Government of punjab (pakistan)  
Got fully funded scholarship for my bachelor's studies by government of Punjab in result of maintaining high gpa

**Prime minister youth laptop scheme** Jan '01  
Government of Pakistan  
Got a laptop by the government of Punjab in order to my exceptional performance in studies

### PROJECTS

---

**Dynamic Portfolio & Admin CMS**

- A full-stack, dynamic personal portfolio with a secure, custom-built Content Management System (CMS) for managing all site content via a RESTful API
- Engineered a full-stack MERN application with a secure RESTful API, featuring JWT/bcrypt authentication and 2 custom middleware functions to manage 7+ data models in MongoDB.
- Developed a multi-page React admin dashboard with full CRUD functionality, enabling dynamic content updates to the public site without requiring code redeployment.
- Built a fully responsive, 7-section public portfolio UI that fetches and renders all data from the custom-built backend API
- E\_plant shopping full stack website with payment gateway integration . Engineered a full-stack e-commerce platform using the MERN stack. Implemented a secure, role-based (user/admin) authentication system with JWT and developed a complete backend API for product inventory management.
- Integrated the Paymob API to build an end-to-end payment gateway for processing transactions
